Subsequent to the pre-approval inspection by the USFDA of the Company's API facility at Navi Mumbai and the formulation facility at Ankleshwar, the Company has received a notice of non-compliance and a warning letter from the USFDA. The estimated time required for corrective steps and complete adherence with the stipulations indicated by USFDA is about two years.

Even though Company continues to hold EU GMP, WHO GMP and TGA, Australia certifications for the API facility at Navi Mumbai plant and UK MHRA certification for its formulation plant at Ankleshwar, some of its existing business has been impacted during the year as a result of the warning letter received from USFDA.

MANAGEMENT DISCUSSION AND ANALYSIS REPORT

1) Industry structure and developments

The Indian healthcare industry has evolved rapidly from being a product centric industry to a service driven sector with delivery and medical insurance segments gaining prominence. India's pharmaceutical industry has been ranked 3rd in terms of volume and 10th in terms of value, globally.

Optimistic estimates predict India's pharmaceutical sector to touch US\$ 45 billion in sales by 2020 from the current US\$ 18 billion. The Indian pharmaceutical market is expected to grow at a Compounded Annual Growth Rate (CAGR) of 14%. India is now among the top five emerging pharmaceutical markets.

Driven by increasing sales of generic medicines, continued growth in chronic therapies and a greater penetration in rural markets, the domestic pharmaceutical market in India is expected to register a growth of 8%-10%. FY' 14 closed with a growth of 62% and CAGR of 11.20%.

In FY '14, growth of the domestic formulation industry slipped to 11.20% from 11.90% in the previous year. Slowdown in the domestic pharmaceutical industry has been attributed to several factors like delays in clinical trial approvals, uncertainties over the FDI policy, the new pharmaceutical pricing policy, a uniform code for sales and marketing practices, compulsory licensing for the domestic pharmaceutical market, regulatory challenges, etc.

2) Opportunities and Threats

Indian pharmaceutical industry has seen gradual increase in government healthcare expenditure & expansion of the private hospital sector. Government initiatives such as allowing 100% foreign direct investment in health and medical services will also benefit the industry. Indian government plans to increase health expenditure to 2.5% of gross domestic product by the end of the 12th Five-Year Plan (2012-17), which will give the sector a further boost.

Several socio-economic factors, including increasing sales of generic medicines, continued growth in chronic therapies and a greater penetration in rural markets will contribute majorly to the growth of the Indian pharmaceutical market. Other contributing factors for pharma industry growth are heightened health awareness, increasing affluence, changing lifestyles resulting in higher incidence of lifestyle diseases and a nascent, yet fast growing health insurance

industry. In addition, low cost of production and R&D boosts the efficiency of Indian pharmaceutical companies.

NLEM (National List of Essential Medicines) announced in 2013, resulted in 652 Formulations coming under price control, thus slowing down growth. At present, about 7% of the Indian market is under price control. These factors have increased the uncertainty on the extent of molecules that could be brought under the scanner of price control in the near future.

Gestation period for new product launch have become longer due to increasingly stringent norms by regulators in the conduct of clinical trials and the data thereof.

The industry growth is largely driven by chronic disease segments viz. cardiovascular, diabetes, asthma, cancer, and largely influenced by changing lifestyles. Intense price pressure in semi-regulated markets, emergence of new local players affecting the branded generic prices, delay in approval of manufacturing facilities by regulated authorities and increased regulatory intervention in price fixation for domestic formulations are threats which the Company faces.

3) Segment wise performance

The Company is exclusively engaged in pharmaceutical business and operates across segments ranging from Global Formulations and Active Pharmaceutical Ingredients (API) to Global Generics and Biotech.

Global Formulation division catering to domestic market and rest of the world market achieved sales of Rs. 153 crores registering a growth of 9.8%. The Company has strengthened its presence in the market by leveraging the existing brands to get newer products launched. The Company also took a host of other initiatives such as increasing the in-clinic effectiveness of the field force through extensive scientific training, emphasis on Focus brands, innovative promotional strategies. These initiatives are expected to reap benefits in the current year too. In the export market, the revenues grew to Rs. 17.21 crores from Rs. 12.04 crores, where the emphasis has been the immunosuppressant products to Asian, African and Latin American markets. Focus brands achieved growth of 20%.

The Global Generics business achieved net sales of Rs. 18.90 crores registering a growth of 9% over the previous year. The increased focus on existing clients in Canada, UK and manufacture of Azathioprine in immunosuppressants,

APIs and oral solid dosage forms has increased the market share and contributed to growth. Your Company expects to increase the footprint of its flagship product Azathioprine Tablets in all strengths by launching in European countries. The Bulk Drug business achieved net sales of Rs. 35.59 crores registering a growth of 27% over the last year. The Biotech business achieved net sales of Rs. 21.51 crores.

4) Outlook

The growth estimate for the domestic Formulation Industry is pegged at 8% and 9%. In comparison to the Industry growth prediction, the Company has taken a growth target of 13% for products promoted through trade channels. In light of the initiatives detailed above, the outlook of the business looks positive.

5) Risks and Concerns

(d) Foreign Currency Transactions

Foreign currency transactions are recorded at the exchange rates prevailing on the date of the transaction. Gains and losses arising out of subsequent fluctuations are accounted for on actual payment or realisation. Monetary items denominated in foreign currency as at the Balance Sheet date are converted at the exchange rates prevailing on that date. Exchange differences are recognised in the Statement of Profit and Loss.

(e) Forward Contracts

Premium or discount arising at the inception of forward contract is amortised as expense or income over the life of the contract. Exchange difference on forward contract is recognised in the Statement of Profit and Loss in the year in which the exchange rates change. Any profit or loss arising on cancellation or renewal of forward contract is recognised as income or expense in the Statement of Profit and Loss.

(f) Revenue Recognition

Sales are recognised when the significant risks and rewards of ownership in the goods are transferred to the buyer as per the terms of the contract and are recognised net of trade discounts, rebates, sales taxes and excise duties.

Income from Product Development is recognised on the basis of contractual arrangements.

(g) Employee Benefits

(i) Defined Contribution Plans

The company has Defined Contribution Plans for post employment benefits in the form of Superannuation Fund, Provident Fund, Employees' Pension Scheme and Employees State Insurance Scheme which are administered through Government of India and/or trustees. Superannuation Fund, Provident Fund, Employees' Pension Scheme and Employees' State Insurance Scheme are classified as Defined Contribution Plans as the company has no further obligation beyond making the contributions. The company's contributions to Defined Contribution Plans are charged to the Statement of Profit and Loss as incurred.

(ii) Defined Benefit Plan

The company has Defined Benefit Plan for post employment benefits in the form of Gratuity. Gratuity Scheme of the company is administered through trustees. Liability for Defined Benefit Plan is provided on the basis of valuation, as at the Balance Sheet date, carried out by independent actuary. The actuarial valuation method used by independent actuary for measuring the liability is the Projected Unit Credit Method.

**Notes forming part of the Financial Statements as at and for the year ended 31st March, 2014**

(iii) Other Employee Benefits

- (a) Accumulated Compensated Absences which are expected to be availed or encashed within 12 months from the end of the year are treated as short-term employee benefits. The obligation towards the same is measured at the expected cost of Accumulating Compensated Absences as the additional amount expected to be paid as a result of the unused entitlement as at the year end.
- (b) Accumulated Compensated Absences which are expected to be availed or encashed beyond 12 months from the end of the year are treated as other long-term employee benefits. Liability for such benefits is provided on the basis of valuation, as at the Balance Sheet date, carried out by independent actuary. The actuarial valuation method used by independent actuary for measuring the liability is the Projected Unit Credit Method.

(iv) Termination benefits are recognised as an expense as and when incurred.

(v) Actuarial gains and losses comprise experience adjustments and the effects of changes in actuarial assumptions and are recognised immediately in the Statement of Profit and Loss as income or expense.

(h) Expenditure on Research and Development

Revenue expenditure is recognised as expense in the year in which it is incurred and the expenditure on capital assets is depreciated over the useful lives of the assets.

(i) Borrowing Costs

Borrowing costs that are attributable to the acquisition, construction or production of qualifying assets are capitalised as part of the cost of such assets. A qualifying asset is an asset that necessarily takes a substantial period of time to get ready for its intended use. All other borrowing costs are recognised as expense in the year in which they are incurred.

(j) Taxes on Income

Tax expense for the period, comprising current tax and deferred tax, are included in the determination of the net profit or loss for the period. Current tax is measured at the amount expected to be paid to the tax authorities in accordance with the taxation laws.

Deferred tax is recognised, subject to the consideration of prudence in respect of deferred tax assets, on timing differences, being the difference between taxable income and accounting income that originate in one period and are capable of reversal in one or more subsequent periods. Deferred tax assets are not recognised on unabsorbed depreciation and carry forward of losses unless there is virtual certainty that sufficient future taxable income will be available against which such deferred tax assets can be realised. Deferred tax assets and liabilities are measured using the tax rates and tax laws that have been enacted or substantively enacted by the Balance Sheet date. At each Balance Sheet date, the company reassesses unrecognised deferred tax assets, if any.

Current tax assets and current tax liabilities are offset when there is a legally enforceable right to set off the recognised amounts and there is an intention to settle the asset and the liability on a net basis. Deferred tax assets and deferred tax liabilities are offset when there is a legally enforceable right to set off assets against liabilities representing current tax and where the deferred tax assets and the deferred tax liabilities relate to taxes on income levied by the same governing taxation laws.

Minimum Alternative Tax (MAT) credit is recognised as an asset only when and to the extent there is convincing evidence that the company will pay normal income tax during the specified period. Such asset is reviewed at each Balance Sheet date and the carrying amount of the MAT credit entitlement asset is written down to the extent there is no longer a convincing evidence to the effect that the company will pay normal income tax during the specified period.

**Notes forming part of the Financial Statements as at and for the year ended 31st March, 2014****30. 2005 Employee Stock Option Plan**

Pursuant to a special resolution passed by the Shareholders at the Annual General Meeting held on 27th August, 2008, the company adopted the Employee Stock Option Scheme titled '2005 Employee Stock Option Plan' (ESOP 2005) for employees and directors of the company including those employees and directors who were to be granted options, pursuant to the Scheme of Arrangement sanctioned by the Hon'ble High Court of Judicature at Bombay on 14th December, 2007, in lieu of options that were granted by Brabourne Enterprise Limited (the transferor company) under its ESOP 2005. The total number of equity shares reserved under the said plan is 250,000 equity shares of Rs. 8 each. The details of such equity shares granted are as follows:

(A) The Remuneration/Compensation Committee at its meeting held on 6th August, 2010 -

- (a) Granted and vested 30,119 equity stock options to employees, in lieu of options that were granted to them by Brabourne Enterprise Limited. The employee had an option to apply for one equity share of Rs. 8 each at an exercise price of Rs. 32.06.

Of these options, 28,391 equity stock options have been exercised in earlier years and 1,728 options remain outstanding as on 31st March, 2014.

- (b) Granted 95,000 equity stock options to the eligible director and employees of the company, with an option for one equity share of Rs. 8 each at an exercise price of Rs. 100 being the price higher than the closing price quoted on the National Stock Exchange prior to the date of meeting of the Remuneration/Compensation Committee. These equity stock options shall vest, in case of employees of General Manager grade and above, equally but conditionally on linear scale based on performance, over five years beginning from one year after the date of grant. Barring certain eventualities, the exercise period to subscribe to the equity shares would be 10 years from the dates of vesting except otherwise mentioned in ESOP 2005.

Of these options, 6,240 equity stock options remain outstanding as on 31st March, 2014 and the remaining equity stock options have lapsed / forfeited.

(B) The Remuneration/Compensation Committee at its meeting held on 20th October, 2010 -

Granted 15,000 equity stock options to an eligible employee with an option for one equity share of Rs. 8 each at an exercise price of Rs. 104 being the price higher than the closing price quoted on the National Stock Exchange prior to the date of meeting of the Remuneration/Compensation Committee. These equity stock options shall vest, in case of employees of General Manager grade and above, equally but conditionally on linear scale based on performance, over five years beginning from one year after the date of grant. Barring certain eventualities, the exercise period to subscribe to the equity shares would be 10 years from the dates of vesting except otherwise mentioned in ESOP 2005.

Of these options, 2,910 equity stock options remain outstanding as on 31st March, 2014 and the remaining equity stock options have lapsed / forfeited.

The company has used intrinsic value method to account for the cost of stock options to employees and a director of the company. Intrinsic value is the amount by which the quoted market price of the underlying share exceeds the exercise price of the option. In view of the exercise price being higher than the closing market price on the day prior to the date of grant, the intrinsic value of the option is Nil. Consequently, the accounting value of the option (compensation cost) is also Nil.

Notes forming part of the Financial Statements as at and for the year ended 31st March, 2014

Movement in the Options under ESOP 2005:

Particulars	Year ended 31st March, 2014		Year ended 31st March, 2013	
	Number of Options	Weighted Average Exercise Price	Number of Options	Weighted Average Exercise Price
Outstanding at the beginning of the year	10,878	Rs. 90.28	102,842	Rs. 89.72
Granted during the year	Nil	Not Applicable	Nil	Not Applicable
Forfeited during the year	Nil	Not Applicable	89,000	Rs. 89.30
Exercised during the year	Nil	Not Applicable	Nil	Not Applicable

Exercisable at the end of the year	10,878	Rs. 90.28	10,878	Rs. 90.28

The weighted average fair value of each stock option on the date of its grant is Rs. 41.34, which has been vetted by an independent valuer. This fair value has been calculated using Black-Scholes Option Pricing Model. The inputs used for this calculation are (i) Average Share Price: Rs. 91.33 on the date of grant (ii) Average Exercise Price: Rs. 90.70 (iii) Average Expected Volatility: 47.98% (iv) Average Option Life: 8 years (v) Average Expected Dividend Yield: 3.50%, and (vi) Average Risk Free Interest Rate: 8.08%. The daily volatility of the company's shares on the National Stock Exchange over a period of time prior to the date of grant, corresponding with the expected life of the options, has also been considered for determining the fair value.

Had compensation cost for the stock options granted under ESOP 2005 been determined based on the fair value method, the company's Profit for the year and Earnings per Share would have been as per the pro-forma amounts indicated below:

	Year ended 31st March, 2014	Year ended 31st March, 2013
